POWERING LIVES FOR 100 YEARS

Parsian
Diesel Power Plant Development Co.

1919

Clessie Cummins founded Cummins to make better diesel engines.

1920s

David Onan founded Onan Corporation and manufactured the first generators for home use. Cummins introduced America's first diesel-powered car in 1929.

1940s

Cummins supplied engines for heavy-duty trucks and most of the field generators used by Allied forces in World War II.

1960s

Onan developed the first generator specifically for RVs in 1961 and introduced a line of automatic transfer switches and paralleling switchgear.

1980s

Cummins introduced the Turbo Diesel engine for RAM pickup trucks.

1990s

Cummins and Onan united strengths under Cummins Power Generation.

2000s

Cummins was awarded a renewed U.S. Army contract for the latest series of military field generators. A new line of residential standby generators was introduced in 2008.

2010s

Builder magazine selected Cummins home generators as "Best in Quality" five years in a row (2010-2014). Cummins was recognized repeatedly as one of the best places to work and has been continuously applauded as a top company for diversity, sustainability and financial performance.

WHAT MAKES A CUMMINS STANDBY GENERATOR RIGHT FOR YOU?*

COMPACT DESIGN

The compact design allows installation close to your home, and the sleek appearance blends into your landscape.

QUIET

Patented sound technology and an advanced housing design help make these generators some of the quietest in the industry.

NO START EXERCISING

The generator offers an eco-friendly way to run diagnostics without starting the engine, giving homeowners confidence while decreasing fuel consumption and noise.

LOAD MANAGEMENT

Intelligent learning allows homeowners to do more with a smaller generator, providing optimal performance and convenience.

EXCEPTIONAL MOTOR STARTING

With powerful motor starting ability, these generators can easily start and run a 5-ton A/C under full pre-load.

COLD WEATHER CAPABILITY

Cummins standby generators are designed to operate at 0° F out of the box and well below freezing with a cold weather kit.

REMOTE MONITORING

Advanced remote monitoring allows you to monitor and control your generator at no cost and from almost anywhere while using a mobile device.

Built with the same innovation and reliability that goes into every engine and generator from Cummins, the QuietConnect standby generators range from 13 to 150 kW.

*Features available on certain models. Speak to your local Cummins-authorized dealer for more information.

POWERING YOUR LIFE.

For decades, the Cummins tradition of rugged reliability has been trusted to provide backup power to hospitals, fire stations and police departments. In fact, Cummins has been building some of the most powerful engines on earth for a century. From battlefields to cornfields, from highways to waterways, Cummins horsepower has helped move the world forward.

That same reliability is also built in to every Cummins home and small business standby generator—because we all need the peace of mind knowing life can go on as normal, even when the power's out. So no matter where you live, our generators can be there, backing up your home or business and powering your life.

LET A PROFESSIONAL TAKE CARE OF IT.

Authorized Cummins Dealers have in-depth product knowledge. In addition to having all the required professional licenses, they must meet rigorous Cummins standards to perform installations, warranty repairs and a full range of services. A Cummins Authorized Dealer can work with you throughout the purchase, installation and ownership of your generator. Talk to a nationally approved Cummins dealer and learn how Cummins can give you peace of mind.
