Overview

Parsian Diesel , the power Generating company, has been established in 1999, by Dr. Mehrdad Ebrahimi - CEO and owner of the company. After the great success achieved in Iran , the aim of the company shifted towards expanding worldwide .

Maintaining good relation with their customers , Parsian Diesel guided his way into the wide market , to his ambitions and beliefs of becoming leaders in Iran and Mideast ,with a trend for growth and the greatest attention and professionalism , the company has been transformed from the family concern of the seventies into a modern managerial structure through the constant development of production capacity , innovation in the product line ,office staff , highly specialized technicians , investment in surveys and research , professional consulting from sector experts for product improvement and perfection , and finally a wide and diverse range of gensets from 2 to 4000 KVA provided in order to satisfy the demands of increasingly existing markets ... all these features make Parsian Diesel an ideal partner for safety and reliability .

Value

Transcending ego, pursuing excellence and a focus on team work.

Mission

To be innovative and a consistent reliable power supplier.

Vision

Building on long-lasting, value-added partnerships with distributors, customers and suppliers.

SKILLS & EMPLOYEE DEVELOPMENT

In today's increasingly diverse and competitive global marketplace, we believe that it is vital that we continue to attract and retain talented individuals from different backgrounds and experiences.

We take pride in having highly skilled and talented employees, including a fully dedicated team of mechanical and electrical engineers with advanced expertise in developing complete product solutions.

We also believe in the importance of a teamwork environment where the cohesive unit of our employees enjoy the privileges of making decisions and continuously work to improve the Organization.

MEETING CUSTOMER NEEDS

Parsian is keen to provide its clients with total satisfaction by:

- offering and promoting high-quality products and services that are innovative, highly reliable and in particular cases environment friendly (Elitech generating sets are one example of products that follow strict European standards)
- offering types of solutions to clients that significantly reduce up-front fixed costs and provide reduced life cycle costs through energy efficiency and professional maintenance
- being committed to superior, reliable and quality 24/7 aftersales services
- providing energy advisory services
- making available spare parts on consignment
- providing extended warranty
- offering free inspection and operational audit services
- providing elaborated performance guarantees
- providing minimized and non-risked deliveries
- offering competitive prices

POWER SOLUTION

Parsian Diesel owes a lot of its success to that fact that we are keen to adopt a flexible approach to our product offering to ensure that our customer receives what he aims for. The Power Solutions team consists of Specialist Mechanical, Electrical Design Engineers, Support, Sales and project Engineers. They are highly qualified and experienced in providing solutions to often-complex power generation requirements of little or no precedence. The Power Solutions team has a very impressive Client List in a wide variety of Industries such as Telecoms, Rental, Retail, Health Care, Leisure, Agriculture, Manufacturing, Oil and Gas.

ORIGINAL SPARE PARTS

Parsian Diesel spare parts concept is based on tailored solutions for our Customers. The degree of autonomy can be freely selected. Our competent contact persons and clear ordering documentation make it easier for your technical and maintenance personnel to obtain spare parts. Flexible production departments and security stocks in our stores guarantee short delivery times for all types of engines especially Cummins and Doosan Genuine Spare Parts.

PowerBox & Canopy

Listen very carefully

Thanks to ultra silent Canopies, not only your gensets but also your ears are protected

sound-attenuated and weather protective enclosures from parsian diesel meet even the strictest sound requirements and provide optimum protection from inclement weather.

- patented recessed lifting arrangement for easier access
- compact footprint, low-profile design
- Easy access to all major generator and engine control components for servicing
- Fully housed, enclosed exhaust silencer ensures safety and protects
- All-steel construction with stainless steel hardware offers durability
- Direct-mounted to a sub-base fuel tank or lifting base
- Many options available to meet application needs
- Meet or exceed EU legislation 2000/14/EC step 2006
